Additional Comments: Mary Beth Tibbs presented a sample bus route that would transport all K-5 students at the same time using twenty busses. Based on the results busses would have to drop and go if students were sent to Spring Grove first. If this was the case, then each school would have to have a separate starting and ending time to their day. It was also observed that students would be on the bus longer if students were dropped off at Richmond Grade School first.

The transportation team has asked to see more route design samples. Once this is completed then another meeting will be scheduled.
