

## **Trex Plastic Film Recycling Challenge For Schools**

Trex utilizes millions of pounds of plastic film each year to create its composite lumber products while keeping this material out of landfills locally and across the country. By building a partnership with schools students can learn the importance of recycling, keep plastic out of the landfills, and be rewarded for their efforts.

REMEMBER: first try to reduce, then reuse, then recycle!

These are the acceptable items:

- plastic grocery bags / produce bags
- reclosable bags (like Zip Lock)
- newspaper sleeves
- dry-cleaning bags
- bubble wrap
- water bottle case and other case over wraps
- toilet paper/paper towel over wrap
- bread bag / cereal bags / salt bags

**All plastic must be clean, dry and free of food residue**

By reducing, reusing, and recycling plastic film, you and your child can help prevent pollution and save natural resources. Please help by recycling your plastic film through April 20, 2017. This activity is brought to you by: TREX, McHenry County Schools Environmental Education Program, and Environmental Defenders of McHenry County
